David

Short answer: Gary Miller is on site and the PRPs began placing rock this am. We will follow up with more specific responses as soon as we leave Carl's management meeting.

Subject: Rock replacement at San Jacinto Waste pits

Good morning,

Are the PRP's, with EPA oversight, able to start replacing rocks to the armored cap today?

If so, how much rock is needed?

How will they be placing the rock?

Will it take a couple of days?

Is there going to be any kind of follow up inspection following the rock replacement?

Thanks,
— Christopher James
